

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. The appended catalogue of additions will give the best indication of the character as well as of the magnitude of the increase of the library during the year. All of the additions have been placed on the card catalogue, and the general catalogue which was published in 1880 is supplemented for library use by the card catalogue to date. The catalogue of the entire library is also in print, being embraced in the general catalogue and the several annual reports since issued, each of which contains a complete catalogue of the additions made during the library year it covers.

GOVERNMENT AND STATE PUBLICATIONS.

Especial attention has been given to the collection and preservation of the publications of the various departments and bureaus of the general government and of the several States. The purpose is to make them as readily accessible as possible for the use of those who are in search of the sources of social and economic history, and their value is now generally appreciated by the student and publicist.

THE PUBLICATIONS OF MASSACHUSETTS.

It should be the effort of every free public library in a Massachusetts town to place upon its shelves in the most readily accessible form as complete a collection as it can make of the official publications of the Commonwealth. They are sought in all parts of the world by those who are interested in the study of our institutions as a basis for the administration of the public affairs of other communities, and their contents should be familiar to every intelligent citizen.

The State library will aid to the full extent of its power any library that will make the effort to perfect its set of State publications, to the end that the information that is collected with great care and published at great expense may serve the purpose for which it was designed,—the enlightenment and protection of all the citizens of the Commonwealth.

Respectfully submitted,

JOHN W. DICKINSON,

Librarian ex officio.

C. B. TILLINGHAST,

Acting Librarian.
